## **“Genealogical Gems in the U.S. Serial Set”**

*The U.S. Serial Set, published by the U.S. Government Printing Office, is part of a vast collection of published public documents popularly known as “Gov Docs” (government documents). The Serial Set ranks among the most valuable genealogical resources for family historians. Containing records of the U.S. Congress, executive agencies, independent commissions, and other entities, it provides a wealth of information, often untapped by researchers.*
